EDUCATION

California Polytechnic State University - San Luis Obispo *Sep 2023 - May 2027*
B.S. in Computer Science
Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Systems Programming, Privacy & Security, Database Systems, Programming Languages, Operating Systems
Campus Affiliations: Society of Hispanic Professional Engineers (SHPE), ColorCoded by ColorStack, Cal Poly Scholars

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, C, Racket, Kotlin
Frameworks & Tools: React, Next.js, NumPy, pandas, Microsoft Excel

EXPERIENCE

Cal Poly Information Technology Services **San Luis Obispo, CA**
Cal Poly ITS Student Assistant | Windows, Linux, MacOS, Jira, Jamf, Slack *June 2026 - Present*
- Deliver frontline technical support to Cal Poly faculty and staff; configure, image, and deploy Windows/Apple computers, laptops, and printers for campus offices and labs.
- Maintain accurate Jira service tickets and troubleshooting documentation in departmental Wiki and SharePoint resources.

Team fEMR Global **San Luis Obispo, CA**
Software Engineer | IntelliJ IDEA, Java, TypeScript, Javascript, React, SQL, Figma *Aug 2026 – Dec 2026*
- Enhance fEMR Global's formulary feature, improving access to medication data for providers across 11 countries, which have turned into 60 deployments and impacted 37,500+ patients.
- Collaborate with a team of 4 engineers to implement CSV import/export and prior-trip inventory workflows, reducing manual formulary setup for medical mission deployments.
- Test and debug 20+ formulary updates to ensure accurate inventory tracking, prevent prescriptions for out-of-stock items, and support pharmacist fulfillment workflows.

2025 SHPE National Cyber Security Challenge **Philadelphia, CA**
Undergraduate Participant *Nov 2025*
- Competed in hands-on cybersecurity challenges including Capture the Flag (CTF), technical trivia, Linux shell command exercises, and code efficiency challenges.
- Placed top 5 out of 30 teams, collaborated in a fast-paced team environment to analyze vulnerabilities, apply security concepts, and solve real-world security problems under limited time.

PROJECTS

LPL University Hackathon - NorthStar | React, TypeScript, Vite, Node.js, Amazon Bedrock, DynamoDB, Amazon S3 *Oct 2026*
- Created an AI-assisted account-transfer platform that prioritizes stalled client transfers and recommends the next action for financial advisors.
- Developed a rules-based risk engine using verified transfer facts and reason codes, with synthetic client and transfer data stored across 5 DynamoDB tables.
- Integrated Amazon Bedrock Knowledge Bases with versioned S3 procedure documents to generate grounded transfer explanations and advisor-reviewed follow-up drafts.

Tic-Tac-Task | React, Node.js, Express, Supabase, Azure, NOM Workspaces, ESLint/Prettier *Dec 2025*
- Worked with a team of 4 and built a room-based, two-player tic-tac-toe web app with simultaneous live updates, turning each square into a timed task so players compete by completing a shared to-do board.
- Implemented core product flows: sign up + create/join game rooms, task descriptions/time inputs per tile, plus UX features like dark mode and cookie-based state/comfort improvements.
- Developed in a monorepo (npm workspaces) with concurrent dev (frontend + backend), repo-wide lint/format automation, and backend test suite (npm test) to support team-scale reliability.

LEADERSHIP

Society of Hispanic Professional Engineers (Cal Poly SHPE) **San Luis Obispo, CA**
Tech Lead Officer *May 2024 - May 2026*
- Took ownership of SHPE's existing chapter website and led ongoing enhancements. I maintained and optimized a JavaScript and React codebase, refreshed content and UX, and implemented analytics-driven updates, contributing to a 30% increase in new member sign-ups and a 20% boost in sponsorships
